Born Regenerated to be Regenerable

Bloom Back: Born Regenerated to be Regenerable

Radici introduces an innovative solution for textile flooring that combines eco-design and sustainability. Bloom Back offers a new approach to textile flooring thanks to its monocomponent structure, made entirely of polyamide 6.

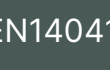

This carpet is composed of Econyl yarn, a regenerated nylon obtained from industrial waste such as fishing nets, textile scraps, carpet floorings, and industrial plastics.

The choice to use a monocomponent structure allows the product to be easily regenerated at the end of its life cycle countless times, reducing environmental impact and promoting the continuous reuse of resources.
